3300 03-127, ER10-02-009
Errata to project Traffic Impact Study
Prepared by Bill E. Darnell and dated October 5, 2010**

October 21, 2010

To page 17, add the following section:

Cumulative Impacts

The project would generate up to 100 weekday ADT, which would contribute to potentially significant cumulative impacts to the surrounding circulation system. However, payment of the Transportation Impact Fee (TIF) would mitigate the potential impacts to less than significant. Refer to the Initial Study discussion XVI. Transportation and Traffic for more information regarding the TIF and mitigation for cumulative traffic impacts for this project.

To page 18, **Summary of Findings and Conclusions** add:

- To mitigate potentially significant cumulative impacts to traffic generation the permittee shall pay the Transportation Impact Fee.
